

Purchase Intent Scorer — Dashboard Workflow

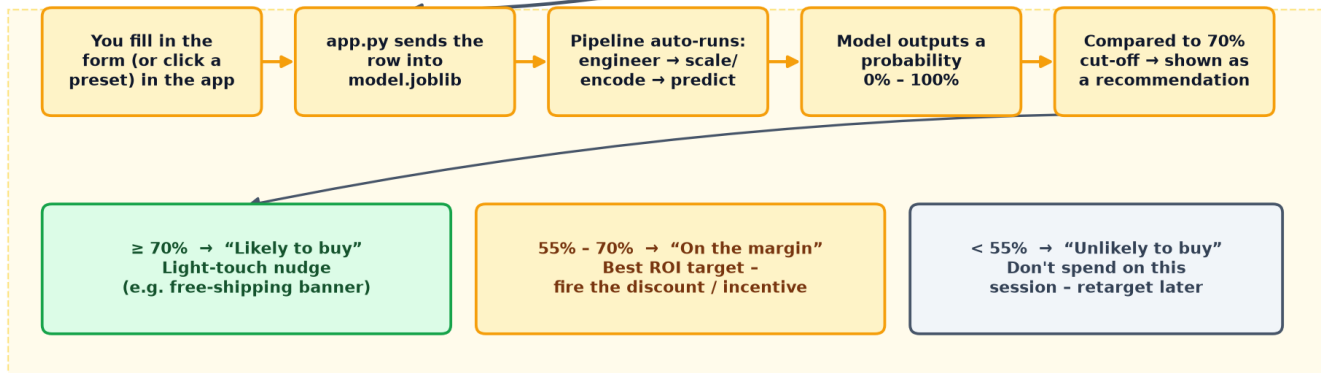

How a browsing session becomes a live buy/no-buy recommendation

How the Purchase Intent Scorer works: from raw data to a live recommendation

STAGE 1 • DONE ONCE, OFFLINE

STAGE 2 • HAPPENS EVERY TIME SOMEONE USES THE DASHBOARD

Stage 1 (top) runs once, offline, to produce model.joblib. Stage 2 (bottom) runs every time a session is scored in the live app.
